Education

Calicut University

Bachelor of Science in Computer Science

Jun. 2021 – Apr. 2024

Malappuram, Kerala

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Web Development
- Computer Architecture
- Software Methodology
- Database Management
- Systems Programming

Experience

Hoztox Technologies

Full Stack Developer

November 2024 – Present

Kuttippuram, Kerala

- Developed reusable and modular UI components to enhance the scalability and performance of the application.
- Integrated third-party APIs and RESTful services into the React application to fetch and display data dynamically.
- Applied best practices in React Hooks and functional components to manage state and side effects effectively.
- Assisted in building and maintaining interactive web applications.
- Implement visually appealing and responsive user interfaces.

Softroniics

Full Stack Intern

April 2024 – October 2024

Calicut, Kerala

- Developed and maintained web applications using the MERN stack (MongoDB, Express.js, React, Node.js).
- Assisted in creating RESTful APIs and integrating them with front-end components.
- Supported the team in writing and debugging code, ensuring high-quality and maintainable code.
- Used version control systems like Git for code collaboration and management.
- Helped develop responsive UI components ensuring cross-browser compatibility.

Projects

Clean City Pro | JavaScript, HTML, CSS, PHP, MySQL, XAMPP

March 2024

- Clean City Pro optimizes waste collection with a user-friendly system by assigning unique bin IDs for efficient route tracking and management.
- Residents can efficiently report garbage issues, enhancing accessibility and responsiveness.
- The system automates record-keeping tasks, ensuring accurate and error-free management.
- It optimizes resource utilization and prioritizes automation for efficient long-term data storage.
- Aims to improve performance and deliver superior client services.

Technical Skills

Languages: JavaScript, C, C++, HTML, CSS, SQL

Developer Tools: VS Code, Eclipse, Android Studio, MySQL Workbench, Git, Figma

Technologies/Frameworks: React js, Bootstrap, Node js, MongoDB, Express js, Tailwind, Postman

Skills and Proficiency

- Proven ability to thrive in a fast-paced environment.
- Highly motivated individual with a strong work ethic and a proactive, team-oriented approach.
- Strong qualitative aptitude, excellent grasping ability, and a keen eagerness to learn.
- Proven decision-making capabilities, leadership qualities, and experience in collaborative group work.
- Keen interest in continually updating knowledge in core subjects.
